YOUR FIELD GUIDE TO THE FOURTH INDUSTRIAL REVOLUTION

Fall 2023 Edition

SAY NO TO AGENDA 2030

COVID, GLOBAL WARMING, 5G, GEOENGINEERING, TRANSHUMANISM, DIGITAL ID & SMART CITIES ARE TOOLS TO IMPLEMENT THE AGENDA. THIS MUST BE STOPPED AT ALL COSTS

A neo-Marxist interdisciplinary social theory pushed forward via intellectual nutjobs who founded [The Frankfurt School](#) in 1923 has been a major factor in the subversive take-over silent war tactics we are witnessing today. Most people have no idea that the plantation owners have had [long-game plans](#) in the works for ages to create a One World Order via the [UN Agenda 2030](#) to control all of their chattels, we the people. The drive to make our lives a [living hell in order to corral mankind](#) into their shitty, commie, fully surveilled [SMART cities](#) is in full swing:

BY AMANDHA DAWN VOLLMER

CONTROLLED DEMOLITION OF SOCIETY (SORT OF LIKE 9/11!)

Some of their designs include:

- ▶ Strategically placing their WEF-trained [cult members](#) in high-ranking positions in politics, banking, industry, etc. Those who do not comply are [destroyed](#).
- ▶ Restricting travel, making it worrisome to travel (increased [airplane crashes](#), [nightmare airports](#), creating major weather events, [especially around major holidays](#) - get people used to staying close to home).

- ▶ Inflating gas prices to discourage travel.
- ▶ Weather warfare (pushing fake climate change as a pathetic cover story — attack the areas they want to be cleared according to their [UN Agenda 2030](#) maps, i.e. all food-growing regions like California, destroy countries with severe weather events that will not comply with the agenda).
- ▶ Manufacturing active shooter false flag scenarios (goal: to take your guns) for one such example see [Sandy Hook](#).
- ▶ Sending FBI agents to cause violence during peaceful, legal protests. Infiltrating all organized protester groups. See [COINTELPRO](#).

- ▶ Sending in undercover CIA agents to spy on college students and disrupt campus protests. See [Operation Chaos](#).
- ▶ Letting safety standards slip, [derailing trains](#), [some carrying](#) extremely dangerous chemicals to traumatize and poison everyone and everything. This also creates a distraction away from other important topics, like the release of Jeffrey Epstein's client list.
- ▶ Using [DEW weapons](#) to start fires, destroy homes, and chase people away from land masses they have other plans for.

Continued on page 3

IS CLIMATE CHANGE A REAL THREAT?

Climate science is undeniably complex and, understandably, lay people have a hard time scrutinizing the veracity of what they hear in the media.[1] The powers that be capitalize on our ignorance and naivete by pushing our buttons, using our sincere concern for the environment, and manipulating us into crusading for our own demise. Mainstream discourse is extremely active “debunking” and “fact checking” any critical views but you must read those with a sharply critical eye as they are almost invariably based on smear campaigns and other logical fallacies, often “disproving” a superfluous technicality and acting as if they had proven the key concept wrong.[2]

The real threat of climate change is falling for its false narrative and its purported solutions. Climate change is being used as an excuse to get us to give up our freedom and sovereignty, accept severe restrictions (to travel, consumption and all manner of activities), welcome 24/7 surveillance, embrace technocracy and transhumanism, become bankrupt and wholly dependent on government welfare (i.e., literally slaves), and celebrate real environmental destruction (such as mining lithium for electric car batteries) with no real benefit for humanity. Be wise, open your mind and start thinking for yourself. Your children and the future generations deserve that.

[1] A good starting point with many additional resources: [corbettreport.com/climatequestions](#) and [corbettreport.com/tag/climate-change](#)

[2] Who Will Fact Check the Fact Checkers? [corbettreport.com/who-will-fact-check-the-fact-checkers](#)

WHAT IS THE “PANDEMIC TREATY”?

Board-certified internist Dr. Meryl Nass issued a disturbing warning that the Pandemic Treaty being pushed by the World Health Organization (WHO) is going to take over the jurisdiction of everything in the world [under the One Health agenda]. Nass warned that the Pandemic Treaty will remove human rights protections currently embedded in the International Health Regulations (IHR), enforce censorship and digital passports, get rid of freedom of speech, require governments to push a single “official” narrative and dictate which drugs should be prescribed in every country.

The treaty's provisions are binding so there are no longer recommendations **but enforceable edicts**. The doctor from Maine added that WHO Director-General Tedros Adhanom Ghebreyesus would be able to declare pandemics at the mere threat of a public health emergency of international concern. He can also call for a world lockdown for declared climate change emergencies as per the treaty.

Adapted from: [sgtreport.com/2023/08/dr-meryl-nass-whos-pandemic-treaty-to-remove-human-rights-sovereignty-under-the-pretext-of-pandemic-preparedness-and-biosecurity-agendas](#)

Read the actual WHO documents: [jamesroguski.substack.com/p/what-is-the-pandemic-treaty-really](#) come to your own conclusions.

THE CLIMATE ACT – ALL ELECTRIC MANDATE

NY's unconstitutional *Climate Leadership and Community Protection Act* (CLCPA or The Climate Act), which was signed into law in July of 2019, set extreme, unrealistic targets for carbon reduction without specifying how these goals would be accomplished. An unelected Climate Action Council (CAC) submitted its final plan to the governor and legislator for implementation in December of 2022. Plans to force people to convert to electric homes, water heaters, cars, stoves, and buildings or face substantial surcharges and carbon taxes will cost residents tens of thousands of dollars in new costs. It may also cause the electric grid to become unreliable, and have a negative impact electric rates. New York State's Climate Act is among the most ambitious climate laws in the nation and requires New York to reduce economy-wide greenhouse gas emissions 40 percent by 2030 and no less than 85 percent by 2050 from 1990 levels.

5G AND BEYOND: A DYSTOPIAN NIGHTMARE

BY GARY NULL PHD AND RICHARD GALE

The World Economic Forum's presentation, *Why is 5G Important for the Fourth Industrial Revolution*, outlines the multi-trillion dollar impact advanced connectivity will have. The **Fourth Industrial Revolution** is a plan for our collective future promoted most prominently by the World Economic Forum (WEF), a small group ... composing, not the world's “one percent, but the .000001 percent.” The World Economic forum has proposed and is advancing a transition from shareholder capitalism to “stakeholder capitalism” that would effectively uproot the nation state and democratic processes to install a “new architecture of governance,” directed by “global leaders” at the top, thus sloughing off moral and legal regard for the inviolable rights to privacy, free will, participatory citizenship and self-determination intrinsic to the individual.

A smart city, or digital city, “resilient city,” “living city,” or a city that has been “built back better,” ... represents a future in which we have no choice to opt out of technological engagement at any time, because all the necessities and amenities of daily life ...are digitally enabled and administered by our interacting with the technology; the computer chip, at every step, is the gatekeeper. How is it that a scientist knew one hundred and thirty years ago that radio waves penetrate the bodies of living beings deeply, but our institutions still don't acknowledge it today? Full article: [garynull.com/5g-and-beyond-a-dystopian-nightmare](#)

The content in this publication does not necessarily reflect the views and opinions of the editorial team, nor does any particular author necessarily agree with or endorse all of the content herein. This is a curated collection of information that we believe is worth reading. We are non-partisan. We seek to expose a worldwide techno-fascist takeover by oligarchs who are unobstructed by the political system.

A Guide to the 4th Industrial Revolution, a.k.a 4IR

We have put together this guide to help you navigate the often confusing territory of the 4th Industrial Revolution (4IR; a.k.a. Agenda 2030, the Great Reset, etc.) and its various component pieces: “Smart” cities, “Sustainable Development” Goals, AI, surveillance, tracking and tracing, carbon credits, social credits, and more.

As summarized in the documentary “Monopoly: Who Owns the World,”[1] Agenda 2030 was introduced by the United Nations (UN) in 2015 with the stated goals of ending poverty, hunger, environmental pollution, and disease, [2] establishing “Sustainable Development Goals” or SDGs. These sound laudable, until you read the fine print. “In short, it boils down to this: The UN wants to take the tax money from all Western countries and give it to the mega corporations of the elite, who will be contracted to rebuild society [...] Globally a whole new infrastructure is needed [...] For this immense project, a world government is needed, says the UN. And the same UN takes it upon itself to be this world government. Just like [Klaus] Schwab [from the World Economic Forum—WEF], the UN also believes that a pandemic is the perfect opportunity to acceler-

ate the implementation of Agenda 2030.”

These topics may seem at times overwhelming and mind boggling, difficult to grasp, or even too technical and boring. However, it is crucial to gain at least a cursory knowledge of the dire implications for our lives and, particularly, the lives of our children. It is the only way we can avoid a dystopian, tyrannical nightmare and envision and create, instead, the life we would like to live.

Spread the word. Do not buy into the model that is presented as the only option. It is not. A few words of caution:

1. Be alert and look beyond the labels so you can find the real meaning. There are many terms used to refer to the same concept (e.g. “smart” cities, “freedom” cities, 15-minute cities, 20-minute neighborhoods), and many more are continually made up. They often can be identified by similar-looking logos. Non-profits and seeming grassroots organizations often carry out, cheer for, and/or implement this agenda, usually unbeknownst to them.

2. Do not get bamboozled by the buzzwords. These ideas are presented to us in a very positive light. They appeal to our good intentions and our desire “do the right thing,” help others and contribute

to make this a better world. Many well-meaning people fall for it out of a genuine desire to do something positive and end up unwittingly doing the bidding of the elite. But if you look at the details you will find deception. This is not the deal you thought you’d get!

3. Use discernment in your research. Mainstream media outlets will not carry this info but will instead claim these are “fake news” and “conspiracy theories”. These are almost invariably unsubstantiated claims or logical fallacies. And they come from the same players who are pushing these agendas. Do not blindly believe “trusted figures” or “fact checkers.” Use uncensored search engines such as swisscows.com. The most prevalent conspiracy known to man is the effort to convince a population that anyone who questions official narratives is a conspiracy theorist who should be shunned. This is done to direct people’s disdain towards those sharing truth instead of toward those who lie to them.

[1] rumble.com/vn7lf5-monopoly-who-owns-the-world-must-see.html

[2] Agenda 2030 is a milestone within Agenda 21, a plan by the United Nations—launched in June of 1992, at the Earth Summit in Rio de Janeiro—to dominate all aspects of human life by placing a command and control structure around all planetary resources, under the guise of addressing global environmental issues.

From the documentary, “Unsustainable: The UN’s Agenda For World Domination”: wide-awake-media.com/unsustainable-the-un-agenda-for-world-domination

TOP TEN 4IR BUZZWORDS

BY JULIANNE ROMANELLO

Please be aware of this language within in your town’s *Comprehensive Plan*. Learn to spot the jargon: the **same words** are used for **every project**, and if these **buzzwords** are there, it’s a 4IR/NWO scam.

- 1] **Sustainable/Sustainable Development** – A centralized, managed economy based on rationing all resources within a new caste system, via 4IR technologies.
- 2] **Resilient** – The ability of the economy to bounce back from disruptions such as sham pandemics, manufactured/natural disasters. Risk management policies through automation, digital transformation, and standardization (e.g., working remotely or shared “gig” jobs).
- 3] **Equity** – A formula for rationing and redistribution of wealth and resources; a justification for data capture and measurement. Standardization of outcomes measuring workers’ value, involves giving carbon credits for privileges and putting everyone on equal footing so every individual is equally disadvantaged.

- 4] **Inclusive** – Forced homogenization and access (e.g. a girls’ sports team to accept boys); quotas; subordinating individual rights to the community, stakeholders’ interests trump individual concerns.
- 5] **Innovative/Innovation** – The digital transformation of all human activities to virtual reality for track & trace infrastructure, i.e. the Metaverse, via 4IR technologies.

- 6] **Collaboration/Community** – A model of bipartisan systems alignment, abolition of voting, politics and dissent, planned to be replaced by partnerships and data sharing between business and government.

- 7] **Transparency/Accountability** – Data mining policies planned to track, trace and report, using blockchain technology and digital identity, to create a permanent digital record of all human activity via the Internet of Things/Bodies.

- 8] **Diversity** – Workforce diversity stipulations and identity politics are designed to create disruptions on the workplace, to divide and conquer workers as a justification for human capital scoring. An end to meritocracy – what you contribute would no longer determine what you get back from your company.

- 9] **Leadership** – Group think, commitment to corporate purpose, adoption of marketing firm language, following the playbook or toolkit.

- 10] **Impact** – Any measurable change that can serve as proof of social engineering, for purposes of validating impact investments and “pay for success” private-public partnership contracts which use shared language, metrics, and goals.

LETTER TO THE EDITOR

To begin, some definitions:

Ignorance: The state of not knowing; **Arrogance:** The habit of behaving based on pride, self-importance, conceit, or the assumption of intellectual superiority and the presumption of knowledge that is not supported by facts

It seems as if freedom of speech is being attacked, not only in this country but around the world.

Since when is censorship something to be proud of? Since when is it OK to refuse to debate?

Our founding fathers called it discourse. It is the process of discussing all sides and attempting to reach a consensus, even if only to agree to disagree at any time, for the purpose of greater understanding.

It is not OK to force one special interest’s opinion on another. It is not OK to deny the right to worship one’s God, nor is it OK to take away a parent’s right to raise their child. It is not OK to remove the right to refuse acceptance of an experimental drug or vaccine. It is not acceptable to fire someone because they are unwilling to be a human guinea pig. These are the *arrogant* actions we have seen, which, sadly, are widely accepted.

We see the danger of monopoly in the medical and pharmaceuti-

cal world, in media and in search engines. Corporations have been allowed to lie about what is in their products, hide negative effects from the population and force these products on us using fear as a weapon. We have an absolute right to know what is in everything we put in our bodies.

To paraphrase Benjamin Franklin : “A nation of well informed people who have been taught to know and prize the rights which God has given them cannot be enslaved. It is in the region of *ignorance* that tyranny begins”

John Jay, back in the 1700s said, “America belongs to ‘We the People’ It does not belong to Congress. It does not belong to special interest groups. It does not belong to the courts. It belongs to ‘We the People.’”

Please do not blindly assume frequently repeated phrases are “facts.”

It is my hope that this newspaper is written to enable all of us to pursue many paths of investigation, to combat *ignorance*, to counter *arrogance* and to empower each of us with information.

You owe it to yourselves and your children to ponder all the possibilities. May the Lord bless all of us and bless our country in these times of tyranny.

Sincerely,
Evan Rogers, Esq.

CHEMTRAILS EXPOSED A HISTORY OF THE NEW MANHATTAN PROJECT

BY PETER A. KIRBY

Evidence suggests that today’s chemtrail spraying operations consist of airplanes saturating our atmosphere with nano-sized particles influenced by electromagnetic energy for the purpose of weather modification. U.S. patent #4,686,605 *Method and Apparatus for Altering a Region in the Earth’s Atmosphere, Ionosphere and/or Magnetosphere* shows how stratospheric and tropospheric aerosols can be manipulated using electromagnetic energy in order to modify the weather. The ground-based antennas (known as ionospheric heaters) needed to produce the appropriate electromagnetic energy exist. [1]

The 1996 U.S. military document *Weather as a Force Multiplier: Owning the Weather in 2025* outlines a program using aerosols sprayed from airplanes which are then manipulated with electromagnetic energy in order to modify the weather. [2]

The common thread here is weather modification; or as the Library of Congress calls it, “weather control.” Lots of other evidence supporting this assertion exists as well, but these two documents are the most salient. Motives are plenty. Most notably, significant direct benefits can be gained by playing financial markets which rise and fall with the weather such as the weather derivatives and catastrophe reinsurance markets; not to

mention agricultural and energy commodities. Enron pioneered the markets. With foreknowledge of the weather, so many scams could be concocted that it boggles the mind. Weather routinely changes the course of Human history. It determines what we do every day. It determines the outcomes of wars and influences elections. Control of the weather is God-like power. Money and power junkies want it.

THE DAILY JOB EDITORIAL STATEMENT

We are not against technology, nor are we for uncritical acceptance of technology; we are against being measured, managed and monetized by technology. We are against technologies being forced upon us by invisible forces without even a chance for meaningful debate. We are non-partisan. We seek to expose a worldwide techno-fascist takeover by oligarchs who are unobstructed by the political system. We claim our God-given freedom and rights, which are protected by the Constitution. We question the veracity of the “science” behind the fear-based, alleged reasons for global governance, including *climate change*, *pandemics*, *nuclear war*, *terrorism*, *fake alien invasions*, and all of the other points addressed in our featured article by Amandha Vollmer.

THE 4IR GUIDE

4IR Concepts

► The Fourth Industrial Revolution (“4IR”), a term coined by Klaus Schwab of the World Economic Forum, describes a technological transformation of all aspects of society, characterized by a fusion of technologies that plan to blur the distinction between the real and virtual worlds. A new economy is planned that will require digital control of every human interaction or service. AI automation will lead to mass unemployment, forcing the population to accept track and trace “human capital” scoring by employees for ESG ratings, along with surveillance programs, for our “safety.” Climate change is used to justify the sweeping transformations that are not at all environmental.

► Agenda 2030 refers to a milestone within Agenda 21—the Agenda for the 21st Century, a long-term UN plan to enable the elite to fully own and manage the world’s resources under the guise of sustainability and environmental protection. Includes reshaping of the economy, moving away

from money and energy into a carbon credit economy and Central Bank Digital Currencies (CBDCs). Also called the New World Order, the Great Reset, Build Back Better, or the 4IR.

► Sustainable Development Goals (SDGs) are steps toward Agenda 2030, listed on the UN website as “a comprehensive plan of action to build a global partnership for sustainable development to improve human lives and protect the environment.” These 17 goals sound good until you look into what is really meant and how they are going to be achieved. The twin pillars of “Sustainable Development” are (1) managing resources (protecting the environment) and (2) promoting economic growth, are presented with deceptive, flowery language, however, the real goal is sustainable, economic development for impact investors via maintaining the population in “improvable” misery. The Inner Development Goals (IDGs) are a communitarian framework that describes the

“inner skills needed to reach the SDGs”.

► Smart cities are high-density urban areas with all necessities in close proximity, within a 15-minute walk or bike ride. These open air digital prisons are surveillance grids for data collecting to feed into an AI system that will measure, manage and monetize human behavior. Private property and land usage will be reconfigured within “Transit Oriented Development”, limiting choices, restricting movement, and eliminating privacy and self-sufficiency. Eventually the 15 minute limit will be strictly enforced. These cities cannot be “sustainable” and “green”, as massive changes are required for implementation, including replacing vehicles, buildings, deployment of surveillance systems, antennas, appliances, and other infrastructure. All will require exploitation of metals such as copper and platinum, rare earths and minerals like lithium, extraction of which involves atrocious working conditions and child labor. The disposal of old devices and structures will create a tremendous amount of waste and pollution. A colossal amount of energy is required for all the technology involved in data processing, automation

and AI. Also called 15-minute cities, 20-minute neighborhoods, 3 mile cities, complete neighborhoods, transit villages, intelligent cities, cognitive cities, freedom cities.

► Each US city or town has a “Comprehensive Plan” with language using the same buzz words as the UN Sustainable Development program of measuring and managing all worldwide resources. These plans for worldwide cities were NOT voted in by citizens, and many local public officials have no idea what they entail. Taxpayers fund the private consulting firms that are currently advising town officials. Comprehensive Planning and the UN Smart City Agenda. (See: [youtube.com/watch?v=f1254KyTaHc](https://www.youtube.com/watch?v=f1254KyTaHc))

► What part did COVID play? The Covid pandemic was a manufactured plan to restructure society, a cover for a techno-fascist regime change. The goal of the worldwide lockdown was to eliminate small businesses, which give the middle class freedom and choice. The fear of a deadly, invisible threat that could not be validated served as the excuse to implement draconian measures restricting human movement and social interac-

tions. This scenario was a training phase for the intended Agenda 2030 measures and is an example of the “shock doctrine” where a catastrophe is used to introduce measures that would be otherwise unacceptable by the majority of people (Problem, Reaction, Solution).

Amanda Vollmer - Continued from p. 1

► Driving people into poverty (via fake covid, hyperinflation, money laundering, bankrupting businesses under the guise of fake covid). This is how communists take over control.

► Driving people into chronic illness (with masking, chemical poisoning, vaccines, drugs, lying about our natural remedies, killing holistic doctors, emotional shock; essentially, death by modern medicine).

► Driving people into addictions using opiates like fentanyl (which often result in people living on the streets).

► Confusing our children’s identity (which is bolstered by chemical poisoning - destabilizing the next generation who will have very few skill sets to fight back with).

► The Rainbow Agenda (many of those transgendered (Baphometted) are ex-cons and pedophiles and wish to “walk among us” so they need to distort sexuality, warp our children, and drown out the sane and grounded gay community, gays against groomers being one such example of a balanced voice.

► The race to install 5G Technology all over the world (part of their Internet of Things and Internet of Bodies (IoB) plans).

► Creating fake wars. Faking cyber attacks. We will need to prevent problems with EMP attacks.

► Using Deep Fake Technology as well as silicone masks and body suits to confuse people further about what is real and what isn’t.

► Gagging/canceling opposition, controlling the opposition, and the rise of “liberal wokeness”.

► Mass immigration, allowing illegal aliens to vote, destabilizing culture.

► Generally creating confusion, chaos, distractions, mortgage defaults, destabilizing the family unit, promoting abortion (murder a.k.a. infanticide, right up to the age of birth).

► Killing the internet (swarm it with bots, make it hard to find anything of value, don’t allow the opposition’s websites to be found in general searches) Research Dead Internet Theory.

► Using AI bots as an excuse for digital ID (so they know we are “human”). Increase robotics to reduce the human job force.

► Destroying worldwide food supplies (many methods), buying up land strategically.

► Attacking farmers by faking disease in livestock to destroy them, which also doubles as a ritual blood sacrifice. Setting factory fires, and allowing grocery chains to monopolize and rip off farmers so they cannot sustain themselves.

► Collapsing the financial system (to bring in their digital currency, microchipping, digital ID system), stealing people’s investments to “save” banks with bail-ins.

► Schools as brainwashing toward this agenda and nothing more.

► Killing wildlife, executing farm animals, selling problematic chicken feed, and making us feel guilty having carbon dioxide-breathing pets, (environmental and psychological trauma).

► Near constant distractions, like sports and Hollywood (bread and circuses).

► Never letting any of this information get into the mainstream (lame-stream, shame-stream) narrative — control all news outlets (control communications - a classic war tactic) - Operation Mockingbird through the CIA.

► And last but not most pressing, Project Bluebeam, faking an alien invasion. Not only a great distraction but also unlocks a fresh, new fear for many. “Are you scared? We will protect you over here, in our shiny, new SMART city! Just get in the oven, it’ll be fine!”

This is literally covert warfare. Silent Weapons for Quiet Wars. Our only option is to resist while we build alternative societies.

FOCUS ON SOLUTIONS

So what are the solutions? People want to fight back against this hidden enemy. How could we possibly fight them directly? That is a fool’s errand. The only real way to “fight them” is to not comply, resist censorship, and educate others about what is happening, step away from the impending stranglehold by our preparedness, and create alternate societies and economies. Sure, let’s certainly be a thorn in their sides — we can call our local councils and make our voice of “thanks but no thanks” heard. I don’t think we should just let them have it so easily, but I also don’t think we should sit back and hope that is going to change anything. [Note: see full article for list of solutions provided here].

Many are waking up to this self-appointed UN/WEF beast and we must not comply with any of it, for the sake of our future and that of our children.

This article is a reprint of *Subversion and Solutions: Their Controlled Demolition and Our Path to Freedom*. Published Feb 18th, 2023. Full article here:

THE BIG TECH EDUCATION TAKEOVER

Parents, are you aware that art, music and physical education are planned to be eliminated from public and private schools and universities? Liberal arts, including literature and history courses are being scaled back or omitted from curriculum. Instead, STEM (Science, Technology, Engineering and Mathematics), is promoted to “train students for the 21st century work force”. Why are unelected billionaire/social engineers (such as George Kaiser, Michael Bloomberg, Bill Gates, and Warren Buffet) funding the “Re-Imagining Education” program? It is a profit-driven plot to put individuals on a work force track, without students being able to make their own decisions. In the process, our children are being exploited as programmers for the 4IR! There are international foundations involved in your local school board’s decision-making via the town’s chamber of commerce. This is a corporate takeover of our schools and our children’s lives. Viewed as commodities, students will be tracked starting at pre-school, and placed in one of a few 4IR career fields based on their assigned aptitude, without their awareness or express consent, with names such as “Cradle to Career”, or “P20 Pipeline” among others. See, for example [luminafoundation.org](https://www.luminafoundation.org). This is sold as entrepreneurship and independence, but it is neither—the 4IR educational system is really about a lifetime of constantly having to market yourself, to conform and adapt to the tastes and preferences of an indoctrinated community.

The “Collective Impact” agenda will force all schools to adhere to the same standards and measurements, with internationally

aligned curriculum, using the same buzzwords: impact, collaboration, innovation, etc. Such restriction and abuse of language is anti-thought. It is brain washing with conformist programming, designed to disguise the fact that the population has lost power and individuality, and to eliminate study of the complexity and diversity of human life. Without indoctrination and the destruction of the ability to think independently within our education system, the dystopian 4IR regime could not succeed. How will education generate a profit for “impact investors” who seek to create a “planned work force”? Data harvesting our children’s educational pathway is a new way of funneling global capital through “Social Impact Investments.” A billionaire investor will fund the administration of a program for a not-for-profit to run, via “Pay for Success” contracts which generate a return for the investor. If the program meets certain success metrics, then the taxpayers will reimburse the investor, along with a success payment for interest. The real profit lies in subsequently selling the program by claiming it saves the public future costs. “Social Impact Finance” creates perpetual conditions of misery that will always need to be addressed because the “philanthropic” programs never fix the problem, they just move the needle to achieve the success metrics.

The 4IR Guide: Glossary of Terms

5G. 5th Generation cellular antenna technology running at 26K MHz, enabling the surveillance grid and the *Internet of Things* (see IoT). *Not to be confused with "5G WiFi", which refers to the 5 Gigahertz frequency used in wireless routers. See [wearenotsam.com](#)

Artificial Intelligence (AI). AI is the intelligence of machines or software, as opposed to the intelligence of humans or animals. Planned to take control, make all decisions, run all activities, monitor and enforce compliance, and train adults and children. However, as a synthetic pretender designed to resemble human intelligence AI should not be perceived as awareness or consciousness; it will only ever be a crude artificial mimicry of human ingenuity.

Bio Digital Convergence. The merging of digital technologies and biological systems, allowing the manipulation and control of biological entities, e.g., drone insects or new forms of the human body.

Biometrics. Body measurements used in computer science as a form of identification and control. Includes fingerprints, retina, gait, signature, etc.

Build Back Better. The military industrial complex orchestrates destruction in order to create desired conditions, e.g., Blackrock is rebuilding Ukraine.

Carbon Credits. Carbon emissions allotment for people, limiting all consumption. Planned to be tracked and tied to an individual's **Social Credit Score**.

CBDC. Acronym for *Central Bank Digital Currency*. Electronic money controlled by a central bank. All transactions would go through this system and can be monitored, allowed or disallowed in real time. Eventually planned to be linked with social credit score; funds can expire.

Circular Economy. The 4IR economy is a "no waste" ecosystem that is planned to supply itself by creating the type of people needed and needing the type of people created. Worldwide consumption is planned to be inventoried and monitored from production to disposal, such as recycling, itemizing trash disposal, even sewage analysis via **Smart Toilets**.

Climate Change. Scientifically challenged narrative promoted by the UN to establish global

governance, with intent to gain worldwide acceptance of draconian measures limiting travel and consumption.

Communitarianism. Ideology in which the individual is subservient to the "community." Used to justify tyranny and the violation of inalienable rights in a centralized, totalitarian, technocratic One World regime under the guise of 'unity' and 'oneness'.

Complete Streets. A Bloomberg Organization program currently being implemented in US cities. Consumption of all resources (food, water, energy) will be controlled via high tech systems. See **c40.org**.

Digital ID. Tool that will allow for 100% surveillance of individuals, linking all data, biometrics, social credit scores, etc. Would enable AI to control and deny individual's activities and transactions based on their compliance with arbitrary **communitarian** rules. Prerequisite for SMART City surveillance grid.

Disaster Capitalism. Also called *Build Back Better*, corporate strategy to cash in on worldwide wars, earthquakes, fires, etc.

E-Governance. Government via technology: tracking systems, RFID, biometric and digital ID, smart cards, etc. Allows hyper-surveillance and forces widespread adoption of technology.

ESG. Acronym for *Environmental Social Governance*. Social credit scoring system for companies and individuals via their employer.

Geo fencing. "Invisible fence" for humans, run by AI, controlling the movement of individuals, likely via facial recognition. Tied to Social Credit Scores, Digital Identity, CBDCs, compliance with medical procedures, etc.

Globalization. Standardization of systems across national borders to create a world government (NWO).

Green New Deal. Power grab disguised as a plan to address climate change. See Rosa Koire, *Behind the Green Mask*.

Human Capital. Monetization, management and monitoring of people's actions and behaviors; the basis of the *New Economic System*.

Impact/Inclusive Capitalism. *Social Impact Bonds* are the cornerstone of the planned new financial system which will profit from human suffering.

IoA. Acronym for *The Internet of Animals*, planned to create an inventory to control all wild animal life under the guise of protection.

IoB. Acronym for *Internet of Bodies*, collecting physical data via a range of devices that can be implanted, swallowed or worn.

IoT. Acronym for *Internet of Things*. Physical objects with sensors, processing ability, software and other technologies that connect and exchange data with other devices and systems over the internet. Enables monitoring and managing of all human activities.

Net Zero. The WEF plan to impose a worldwide zero carbon emissions restriction via a system ensuring that the carbon released into the atmosphere is equal to the carbon removed.

NIEO. Acronym for *New International Economic Order*, created via 1974 UN resolution. **NAFTA** and the US signing of the Agenda 21 "Paris Agreement" in 2015 are NIEO tools of economic totalitarianism. Data — the new oil — will be used to control human behavior to benefit corporations.

Pay for Success Programs. Private, for-profit funding of social and educational programs, under the guise of not-for-profits. Allows for social engineering based on data harvesting within intervention programs. See also **Impact/Inclusive Capitalism**.

Poverty Industrial Complex. Non-profit organizations that profit from poverty and trauma through a population made dependent on programs.

Pre Crime. The collection of information about everyday activities is planned to detect and prevent future behavior. Information is planned to be analyzed, shared, stored, and used to identify potential criminals in the name of combating terrorism, eliminating the core societal value of presumption of innocence.

Public Private Partnerships. Fascism; collusion of government and big business, with no accountability.

RFID. Radio-frequency identification sensors using electromagnetic fields to automatically identify and track tags attached to objects (as well as people and animals).

SMART. The use of electronic methods and sensors to collect data from people, devices, "resources," etc., in order to manage (i.e., control) them. Possible acronym for Sustainability, Monitoring, Assessing, Rating and Tracking.

Smart Environment. Access to natural resources, including land, planned to be managed by an automated system.

Smart Governance. Automated government by AI. Includes E-Health, E-Learning, E-Commerce and E-Banking/CBDC. See also **Communitarianism**.

Smart Grid. Connecting energy and water to a central control center. Threatens access - for example electricity can be remotely turned off via smart meters.

Social Credit Score. Scoring system for individuals. Enables tracking of citizen movement and evaluation of "trustworthiness." Controls access to services and locations, based on an individual's compliance to unconstitutional mandates.

Stack and Pack Housing. The apartment complexes currently being built worldwide, designed to eventually eliminate private home ownership.

Transhumanism. Merging people with machines for the purpose of "enhancement", longevity and control. Also achieved by eugenicist gene editing using CRISPR technology

Transit Oriented Development (TOD). Land grab in cities. Urban development (jobs, housing, communities) will be clustered around public transport hubs. "Land Value Capture" will force landowners to sell, enabling installation of **15 minute smart cities**.

UBI. Acronym for *Universal Basic Income*. A minuscule stipend provided by the government which can be taken away, based on compliance with arbitrary regulations. Designed to mitigate the unemployment that will result from the replacement of humans in the work place by AI/robots/automation.

UN. Acronym for *United Nations*. A NWO front founded by the Rockefeller family. The UN Agenda 21 reveals the intention to control every aspect of human activity.

Zero Trust. A social system that forces citizens to show their identity with facial recognition (or other biometric means) before initiating any activity.

THE 4IR GUIDE 4IR LAND GRABS

America the Beautiful is an Executive Order signed on January 27, 2021. This is, essentially, a 4IR land grab posing as environmental protection. Its goal is to convert all public access land and private land assets into "land trusts", taken off the market and protected into perpetuity so Americans cannot own land. Both urban and rural areas will be affected.

America the Beautiful calls for the U.S. to "conserve" at least 30 percent of its lands and waters by 2030 (over 4x the size of California), increased to 50% by 2050, which will eventually be off limits for citizen use. It is presented as a Federal program, but it supports the "30x30" goals that have been proposed under the UN's Convention on Biological Diversity—a worldwide land grab signed by 150 government leaders at the 1992 Rio Earth Summit and "conceived as a practical tool for translating the principles of Agenda 21 into reality."

Exposing the Federal Land Grab and 15 Minute Smart Cities: Rural Management for the Digital Economy presentation by Dr. Julianne Romanello:

📺 youtube.com/watch?v=ZNa-IM55z_g

THE WILDLANDS PROJECT - "MANHATTANIZING AMERICA"

The process of returning land to its wild state is referred to as "re-wilding." Wildlands are created by buying land, reducing or eliminating human activities and access to the land, and then putting buffer zones around them. Other wildlands are created nearby, and these areas are then connected with more land purchases, eventually forming corridors which then connect to one of the four North American Wildways.

This project is supported and managed by groups like the Sierra Club and The Nature Conservancy. The ultimate goal is to erase any sign of human activity (houses, roads, farms, etc.), pushing people out of wildland areas and into Smart megacities. See: nwri.org/the-wildlands-project

The U.S. government's implementation of the *Convention on Biological Diversity* (CBD) is being carried out by the "Wildlands Network", which shares the same goals as the CBD: cbd.int.

See the Emerging Megaregions map:

📍 postimg.cc/MfY1fGyv

All of the circles on the map represent planned Smart Cities. The colored areas represent inter-locked Mega-Regions designated for "Human Habitats." Everything else you see on the map will be off limits for human use, to "leave room for nature."

We are the Drivers of our life experience—capable of maintaining and creating a positive vision, for a probable future reality.

Infinitely more than these physical bodies, we are limitless, unfolding consciousness with enormous power. Each one of us has that Power of Creation at the core of our existence, the life force that moves through us, for us, as us—Divine Love / Source / God.

This is not the end! The digital version has 30 more articles.
glitchjournal.com/the-daily-jab

Are Electric Vehicles Environmentally Sound?

Look at the following facts and decide for yourself whether Electric Vehicles (EVs) are environmentally sound, and ponder what your life will be like if gas cars are banned:

► There are 1,200,000,000 cars in the world. 7,000,000 (0.6 %) are EVs. At 80,000,000 new cars manufactured per year (before the crisis) it would require at least 15 years to replace the current fleet (assuming it is possible to manufacture EVs at that rate and not accounting for replacement of old vehicles).

► Gas cars have an autonomy of 800-1000 km (500-600 miles) while EVs have a stated autonomy of 400 km (250 miles). But that's under ideal (unrealistic) conditions: a light-weight driver, no passengers, no luggage, perfectly flat and well paved road, constant speed, no heating or air conditioning.

► You can fill up a gas tank in 3 minutes. Recharging an EV can take one hour. Ultra-rapid charge takes 15 minutes BUT it is less efficient (more electricity is wasted as heat, which can also pose fire risks) AND shortens battery life. Imagine being on the road, not enough charge to get to the next charging station, and having to wait for 3 cars to recharge ahead of you. - The battery weighs 500 kg (1100 lb, which requires more energy to move it around with the car). 30-50 kg (65-110 lb) are lithium carbonate. On top of all the destruction cause by lithium mining, there is just not enough lithium deposits to replace the 1.2 billion cars in the

world with EVs. And that's not counting the trucks, buses and other vehicles.

► A modern car has 3 kg (7 lb) of copper. An EV has 40 kg (90 lb). And copper reserves are declining. Copper ore in the Chilean Andes (the largest reserves) is increasingly depleted, requiring ever larger amounts of ore, energy and water to extract the same or lower amounts of pure copper. The Andes are being destroyed with monstrously huge trucks, cranes and other equipment. Desalinated water from the ocean is being pumped to an altitude of 3000 m (9800 ft) for leaching.

► These resource-intensive batteries have to be replaced after 6-8 years under the best of conditions.

► A large proportion of car owners in cities do not have a garage and park their cars on the street overnight. Not only this further diminishes the battery life, but would require installing multiple charging points per block, with thick copper cables and mid-tension towers (and probably having to break the sidewalks to run the installation). Who is going to pay for that? - An EV costs about \$30,000 - 100,000. Who can afford it?

THE EUROPEAN COMMISSION AND WHO LAUNCH LANDMARK DIGITAL SLAVERY INITIATIVE TO CENTRALIZE AND INSTITUTIONALIZE GLOBAL TECHNOCRATIC IDOLATRY

BY KATHERINE WATT

In June 2023, WHO will take up the European Union (EU) pilot project of digital COVID-19 slave control to establish a global system that will help facilitate centralization of global financial, social and political

power and protect the rulers of each former nation-state from current and future attempts at accountability.

② bailiwicknews.substack.com/p/the-european-commission-and-who-launch

EMBRACE LIFE, REJECT DIGITAL ENSLAVEMENT!

As we inch closer to things like vaccine passports, biometric IDs, 5G and the digitization of life as we know it, few people realize how it all works, why we are doing it, and what the far-reaching implications are. These all fall under the umbrella terms "Technocracy" and the "Fourth Industrial Revolution". This interview covers the following arenas [among others]:

- How will our data be used in the future?
- Monitoring, tracking and tracing all of natural life of earth
- Understanding the Internet of Bodies
- the future of education
- Transhumanism and the merging of humans and technology
- The problems with Universal Basic Income (UBI)
- The potential future of food
- What we are really fighting for
- defending natural life

WE DO NOT CONSENT

Dear Public Servant: No, you will not be mandating anything to me. Apparently there's some confusion on your part about the relationship we have. You work for me; I'm not your servant nor your slave. I will not be talked down to, I will not be mandated to, I will not be forced to do anything against my will. You are my employee, it's not your place. Get it straight.

We The People, who hold the power Speak Out! Our silence is considered consent. *We do not consent to a one world government.* We choose to maintain our national and individual sovereignty.

Disobedience is the ultimate keystone of liberty. Compliance is the sandbox for slaves.

WE DO NOT CONSENT TO:

- cyber-physical/bio-digital convergence
- life in a 15 minute neighborhood/city
- facial recognition scanning
- monitoring or rating by a social credit system
- control or monitoring of our mobility or purchases
- digital currency, token based economy, twins or avatars
- art, music, or poetry created by machines
- use of QR codes or apps for previously straightforward activities
- public transport without staff
- supermarkets without cashiers
- synthetic beef, bio-engineered food products, or genetically modified food products
- eating bugs!

REMEMBERING WHO WE ARE

BY PAUL CUDENEC, WINTER OAK

What exactly is it, this powerful and primal surge of happiness that courses through our veins when we are united with other people with some kind of common aim, even when this aim is simply to enjoy ourselves?

I would say that it is with-energy, the power we find within ourselves when we are aware of our belonging to something greater than our individual being.

[The system] has long been working towards [...] destroying living communities everywhere, replacing horizontal relation-

ships with vertical ones, peddling a creed of pseudo-individualism in which each of us is supposed to be at the same time meekly obedient to central power and blindly callous to the needs and wishes of our fellow citizens.

The joy we gain from coming together with other people is the joy of remembering our belonging to a greater natural entity, the joy of remembering who we are.

Tell your local authorities you will not be accepting climate scam restrictions on your **freedom of movement!**

AND WE WILL NOT WEAR MASKS!

The **Cochrane Review** poured over 78 mask studies and concluded there was little to no evidence that facemasks provide any protection against viral transmission.

② covidreason.substack.com/p/78-studies-show-very-little-evidence

The CDC misrepresented mask data! Secret Letter to CDC: Top Epidemiologist Suggests Agency Misrepresented Scientific Data to Support Mask Narrative:

Documents recently obtained from the National Institutes of Health suggest public health officials used inaccurate information and misrepresented medical research to advance their policy objective that masks prevent severe COVID-19 and virus transmission, despite opposing scientific evidence received from experts:

② zerohedge.com/political/secret-letter-cdc-top-epidemiologist-suggests-agency-misrepresented-scientific-data

Mississippi's governor agrees:

② mailchi.mp/5dd152f9c1de/governor-tate-reeves-mask-mandates?e=ae3824fee2

QUESTIONS WE SHOULD ASK ABOUT TECHNOLOGY

The 4IR is forcing a barrage of new technologies upon our lives, with the promise of literally changing what it means to be human. With such profound implications, we cannot afford to blindly trust that technological "advances" are always positive or unavoidable. Before we embrace any new technological innovation, a few questions might be appropriate, such as these posed by New York philosopher Neil Postman in the 1990s:

- 1] What is the problem to which this technology is the solution?
- 2] Whose problem is it?

3] Which people and what institutions might be most seriously harmed by a technological solution?

4] What new problems might be created because we have solved this problem?

5] What sort of people and institutions might acquire special economic and political power because of technological change?

6] What changes in language are being enforced by new technologies, and what is being gained and lost by such changes?

7] What other questions would you ask?

ECONOMIC RESET - FROM FIXED CAPITAL TO HUMAN CAPITAL

BY DR. JULIANNE ROMANELLO

The economic reset is designed to turn all businesses into social change agents and soft enforcers of the UN Sustainable Development Goals. Employees are to be seen at all times as brand ambassadors for the companies that employ them. This means that there will be no meaningful difference between "on- and off-the-clock." Adherence to

HR motivational-speak will be required in one's private, personal time just as if he or she were at the office. This is what is meant by the line "you'll have no privacy and you'll be happy."

② heartsoverhexagons.com/uncategorized/economic-reset-from-fixed-capital-to-human-capital

ELITIST CONTROL OVER SOCIETY

RICHARD GALE AND GARY NULL, PHD

I.F. Stone wrote, *“Every government is run by liars, and nothing they say should be believed...”*

Today, the banking elite own the lives of millions of Americans by imprisoning them in debt. The majority of this debt, in the form of mortgages and outstanding home equity, student and auto loans, credit cards, etc. is money owed to the banking industry. It is by keeping citizens in debt slavery, and securing government allegiance and protection to extract money from citizens, that enables bankers to control the economy.

In an article appearing in the UK's Independent, a senior UK investment banker stated, “At one major investment bank for which I worked, we used psychometric testing to recruit social psychopaths because their characteristics exactly suited them to senior corporate finance roles.”

Unless people better understand the interrelationships between all the power bases in America and the world at large, they will wake up one day and realize they have lost their individuality and personal sovereignty over their lives. They will have unknowingly sold themselves to their new rulers. (emphasis ours)

ELECTROMAGNETIC RADIATION: SHIELD & EDUCATE YOURSELF, SAVE A LIFE

BY TAKE BACK OUR TECH

We all use wireless devices, but do you really understand their effects on your health? What happens when you take phone calls pressed up to your ear? Or when you use a tablet/computer on your lap? What could happen to children and loved ones?

Human beings are bioelectrical systems. Our hearts and brains are regulated by internal bioelectrical signals. Environmental exposures to artificial EMFs [electromagnetic frequencies] can interact with fundamental biological processes in the human body. We have good evidence these exposures can damage our health, or that of children of the future who will be born to parents now immersed in wireless exposures.

② takebackourtech.org/emr-save-a-life

THE PERILS OF FACIAL RECOGNITION

Facial recognition should not be implemented anywhere! Your Digital ID is a pre-requisite to the success of Smart City surveillance grids. Facial recognition technol-

ogy comprises three primary components:

▶ Sensors (visible & invisible light cameras, LED & laser projectors etc.) connected to an IoT network

▶ Software + AI (information processing on captured face + body)

▶ Storage + Access (storage of key biometric information about face along with everything else about each individual's life on a blockchain. Zero Trust world is here)

② usatoday.com/story/news/nation/2023/08/08/facial-recognition-technology-wrongful-arrest-pregnant-woman/70551497007

② govtech.com/education/k-12/ny-state-report-cautions-against-facial-recognition-in-schools

THE PUSH FOR AI GOVERNANCE

The downplaying of elections is the start of a gradual push for AI controlled government and elections.

② nytimes.com/2023/08/21/opinion/elections-democracy.html

Adam Grant of the Wharton School argues for a lottery to randomly select political leaders from everyday citizens, rather than a voting system that encourages candidates with “exploitative personality traits”.

② penntoday.upenn.edu/penn-in-the-news/worst-people-run-office-its-time-better-way

STOP BIG GOVERNMENT TAKEOVER OF WIRELESS DEPLOYMENT

STOP HR-3557 AND HR-4141

HR-3557 and HR-4141 are proposed federal telecommunications bills that would eliminate nearly all state and local control over Wireless Telecommunications Facilities (WTF) and would enable the construction of a Digital Prison for Americans.

Get Informed and Take Action:

IS “CONGESTION PRICING” COMING TO A CITY NEAR YOU?

“Congestion Pricing” is a program to charge drivers \$9-\$23 for driving in large sections of cities. It's coming to NYC by spring of 2024 and elsewhere worldwide, an initial step toward eventually eliminating cars.

Funds will be collected via the EZ-Pass:

② cnn.com/2023/06/26/business/new-york-city-congestion-pricing/index.html

② manhattanbp.nyc.gov/initiatives/congestion-pricing-plan

THE DANGERS OF EMF

5G small cell antennas are coming to our neighborhoods, posing an undeniable risk to our health. Involuntary exposure to radiation is not acceptable! 5G-ready antennas are not required for better service or public safety. For full article go to garynull.com/5g-and-beyond-a-dystopian-nightmare

▶ 5G is the next generation of wireless technology. 5G “small cell” antennas will emit wireless radiation.

▶ The US government's human exposure guidelines for wireless radiation haven't been updated in over 23 years, while new technologies have exposed us to ever increasing doses of higher frequencies.

▶ Peer-reviewed science has proven that prolonged exposure to wireless radiation has biological effects which can cause serious health problems.

▶ In 2018, a major study by the National Toxicology Program (NTP) of the National Institutes of Health found “clear evidence” of an increased risk of certain types of cancer from wireless radiation.

▶ Thousands of other studies have also shown the potential for health impacts including reproductive problems, neurological impairment and hypersensitivity. - If you have fiber optic cable, you already have the fastest, most secure and safest internet service possible.

DEBUNKING THE DEBUNKERS

4IR agendas are documented on the UN and WEF websites, along with many mainstream media outlets. Be aware of “fact checker” propaganda which attempts to discredit the exposure of the documented agendas by independent citizen journalists.

A search online for the term “15 minute city” returned an alarming number of proponents of the idea, with many sites addressing dissent or questioning as “conspiracy theories” - including the deep state controlled [msn.com](https://www.msn.com), [cnn](https://www.cnn.com), Associated Press, Wired, even Teen Vogue.

If it's all just common sense town planning regarding access to amenities...

▶ Why are the same agendas being pushed in lockstep around the world?

▶ Why is there a globally coordinated marketing campaign?

▶ Why are the graphics almost identical - often looking like they are from a children's book?

▶ Why do the steering groups in each city's newly drawn zones offer no transparency about their funding streams?

The planned financial system is based on the “Internet of Things”; the ubiquitous installation of sensors, microchips and cameras to collect data on our behavior, for dominance and profit:

② governing.com/news/headlines/florida-cities-get-smart-with-the-internet-of-things.html

WHAT'S A DIRECTED ENERGY WEAPON?

Directed Energy Weapons (DEWs) are not new, they have been used for 50+ years! In regard to worldwide fires, Tesla's “Death Ray” DEWs were used to create 200 unnatural fires after a manufactured drought in April of 1947, which leveled nine towns in Maine. DEW deployment is often done to evacuate citizens who live where real estate prices are high and the land is wanted for “land grab” development.

▶ Explained with evidence at 20 minute mark:

② lightonconspiracies.com/nikola-teslas-death-ray-the-maui-fires-3

② amg-news.com/direct-energy-weapons-dews-aka-electronic-harassment-weapons-is-the-invisible-predator-video/

In 1965 the Joint Chiefs of Staff requested that the Secretary of Defense initiate research to determine the feasibility of measuring the flammability characteristics of forests and jungle growth, modifying flammability so that vegetation would readily support combustion and developing measures to destroy large areas of forest or jungle growth by fire. This research has been conducted by the Forest Service of the Department of Agriculture, under sponsorship of the Advanced Research Projects Agency through ARPA Order 818. The primary research attention was given to the flammability characteristics of jungle growth in tropical and monsoonal climates where forest fires seldom occur naturally.

② apps.dtic.mil/sti/citations/AD0509724

IS MONEY BEING ELIMINATED? DISMANTLE THIS!

Payment systems are being changed so that money is no longer used. In lieu of money, you will pay with your behaviors — behaviors that create “value”. Nation-state-promulgated currencies must be eliminated before this can take full effect. Stablecoins are the opportunity to make national fiat currencies obsolete. Once there is no “value” attached to the nations' authority to issue currency, the private fintech companies can transition from US Dollar-backed stablecoins to stablecoins that are referenced to your concrete compliance with some conception of stakeholder value. Whatever the stakeholders value will change in response to consumer/community preferences. Where nation-states manipulated the quantity of money (used to register one's perceptions about what is most desirable), the reseters will manipulate (through marketing and the p-word) the meaning of “value” so that bartering in behavior-outcomes-securitized tokens and “stablecoins” may become the currency for the new financial system.

Visa just announced that it will partner with WorldPay, Nuvei, and Solana blockchain to settle payments in stablecoin assets rather than national currencies. This is a HUGE step toward scoring the global “value” of your life — which may be manipulated because the Network has the capacity to analyze payment flows and to deliver smart-phone enabled carrots and sticks that will signal the ways in which you can prove that you are a good global citizen.

THE 4IR GUIDE WHY WE ARE DOING THIS?

Our federal government has been taken over, co-opted, part of a merger and acquisition of a corporate criminal syndicate. This cartel is not operating according to the rules of the Constitution or of statutory law. Our government is being privatized - put into the service of private corporations that are redesigning our economy based on restricting, tracking and tracing every movement of every individual on earth. We want to spread awareness and promote connection and discussion. We want to unite to take action to protect land, car and home ownership, and to protect our access to pure food, water and the air we breathe. We the people have the power to stop this coup d'état!

JOIN THE MOVEMENT!

Let's bring this important information into public awareness and conversations. Public officials must hear this if they are to act on our behalf. Local politicians must oppose the techno-fascist takeover by the elite-corporate criminal syndicate. **Mass non-compliance is the only way to end this!**

If you know something, SAY SOMETHING! This is an all-hands-on-deck moment for humanity, truly a numbers game. The dark forces behind the 4IR thrive, depend on, and count on, good people doing and saying nothing, or blindly accepting what is dictated by so-called "experts". Let's prove them wrong. Don't buy the propaganda. Join the movement to preserve our freedoms. Visit these websites for more information:

Q 2030:

Jane and Jamal want to buy some lab-grown apples before the 5pm curfew. The apples cost 4 digi-credits each. Jane has 12 credits but Jamal only has 3.

Jane wants to buy an apple for Jamal. However, Jane's account has been frozen because she criticised the government in an online post.

Do you really want this future for your children?

BAN THESE BANS!

LIFE HACKS FOR 2023

- 1) If Bill Gates is involved, avoid it
- 2) If the news says it's good for you, it's not
- 3) If Klaus says you will be happy, you won't
- 4) If the FDA says it's safe, it's probably not
- 5) If you're being silenced it's because you're sharing truth

ARE WORLDWIDE FIRES BEING MANUFACTURED?

From Dr. Barre Lando, whose off grid farm in northern CA has been surrounded by fire:

"These fires are not normal, in both number and character. The staggering multitude of constant fires, and erratic nature amidst other observable anomalous phenomenon are now revealing predictable patterns. I have cited weather-modification, atmospheric aerosoling and DEWs as the three primary factors underlying this new wave of institutionalized arson. As a former professional firefighter I call BS on the conventional climate change, and other cover stories that attempt to divert from the obvious. This is warfare!"

THE 4IR GUIDE

U.N. Sustainable Development Goals Decoded

Agenda 2030 is a comprehensive global framework adopted by the United Nations in 2015. It sets forth a set of "Sustainable Development Goals" with many targets to allegedly address economic, social, and environmental challenges facing the world. The World Economic Forum (WEF) actively supports and promotes the implementation of Agenda 2030 alongside the UN and other stakeholders (public-private partnerships).

On the surface it looks great. After all, why would anybody want poverty or hunger? And that's exactly how people are manipulated. It's all just marketing:

- ▶ **No poverty:** total dependence on the state. Impoverish middle and lower classes to make the rich even richer. Programmable Central Banking Digital Currency (CBDC).
- ▶ **Zero hunger:** GMOs, fake "food", insects, limited dietary options.
- ▶ **Good health and well-being:** mandatory vaccination, one-size-fits-all medicine, ban on natural remedies and treatments.
- ▶ **Quality education:** indoctrination and Social Engineering.

- ▶ **Gender equality:** confrontation between the sexes, destabilization of society, destruction of the family.
- ▶ **Clean water and sanitation:** rationing and control of all water.
- ▶ **Affordable and clean energy:** abusive "green" taxes. Energetic control & rationing.
- ▶ **Decent work and economic growth:** worker exploitation by big business & corporations, technocratic corporatocracy.
- ▶ **Industry, innovation and infrastructure:** Fourth Industrial Revolution and TRANSHUMANISM, robot workforce, unemployment, Universal Basic Income for compliant citizens
- ▶ **Reduced inequalities:** Lowered standard of living for all (except the elite).
- ▶ **Sustainable cities and communities:** surveillance and control in digital prison cities (smart cities, 20-minute neighborhoods, drones, facial recognition, increased exposure to harmful unnatural electromagnetic frequencies).

- ▶ **Responsible consumption and production:** rationing, abolishment of private property, social credit system.
- ▶ **Climate action:** geoengineered weather, climate lockdowns, carbon footprint surveillance, travel bans.
- ▶ **Life below water:** control & rationing of seafood.
- ▶ **Life on land:** control and rationing of natural resources, restricted access to wilderness, "people-free zones".
- ▶ **Peace, justice and strong institutions:** Police states.
- ▶ **Partnerships for the goals:** *one world government, one law for all countries.*

BEWARE THE AGENTS OF CHAOS

BY RICHARD GALE & GARY NULL, PHD

It is high time we realize there are no longer any adults in the Oval Office and boardrooms of Washington, Wall Street and Silicon Valley. The agents of chaos govern us. True diversity and authentic individuality, which are motivated by higher principles, are technocratic tyranny's obstacles that must be overcome and destroyed. It is left to those of us who have been cancelled and excluded from the national dialogue about our country's deterioration to continue to probe more deeply into our own lives and build community with like-minded people.

Beware of the Metaverse: Web 3, LiFi, and 6G

WORD NEEDS TO SPREAD, THESE TECHNOLOGIES PLANNED TO RUN THE 4IR MUST BE DISMANTLED!

"The Metaverse" is a network of 3D virtual worlds, an online immersive technology planned to control human interactions, blur the lines of reality, and separate humans from the natural world. The goal is to converge the human mind with technology in a bio-digital fusion via Web 3, restricting the population to live inside a mixed reality, a simulation, similar to a video game. 6th Generation wireless antennas (6G) will enable the fusion of digital, physical and human worlds, use of digital twins, drones, propelling the 4IR to new levels with the massive scale deployment of sensors. This technology will also enable AI machine learning, the Metaverse, cloud computing, and the Internet of Things. Raw data from humans and nature goes into the cloud to be analyzed by AI and inventoried on blockchain ledger. The Metaverse automates farming with ro-

botics and needs 6G to operate. It will provide computing power so the network is the sensor, working in concert with our devices. Uses high radiation - 100-3000 HHZ.

A "digital twin" is a virtual replica within the Metaverse of something in the physical world, made from all data known about the subject, designed to accurately reflect a physical object in the digital sphere. A cyber twin can be anything: a person, tree, car, or bird, whose data and actions can be mined and manipulated. All digitized information about every individual on the planet is planned to be bundled together and tethered to identification: digital or biometric ID, or facial recognition. For planetary scale computing, the plan is for everything to be twinned, even your beating heart will ultimately be copied and inserted into your "avatar", according to Nokia Bell Labs ("for your safety"). The idea is to make controlling the world much easier by coordinating the economy of all resources, energy, production,

consumption, waste, trade and transaction through the digital platform, which will directly operate the physical world. This is the reason for the monumental push to convert everything into the digital sphere. nokia.com/thought-leadership/articles/digital-twin-of-the-human-immune-system/

Web 3 is the next iteration of the Internet, a digital replica of the earth, with all its living and dynamic systems 'mirrored' online. Our digital twins are planned to "live" there, updated in real time and space from sensors in the environment continuously retrieving information (from phones, devices, appliances, cars, LED smart lights, private cameras, government and private industry's databases, smart eye glasses, smart watches, smart meters, license plate readers, surveillance cameras). Web 3 uses blockchain metaverse (immersive digitalization) and digital currency, which is lifted out of your account if you have the credit to use the internet. All Web 3 internet activity will be

"decentralized", meaning its tied to each individual, and It's not optional. The difference between Web2 (our current interactive online space) and Web3 is that Web2 is optional - online transactions are optional, handing over your data to applications is optional. Web3 won't be optional - de facto digital ID and currency means we wouldn't be able to choose how to transact with hospitals, clinics, schools, city councils, workplace, gyms, restaurants, libraries, even coffee shops, retail stores, museums, supermarkets. Your digital twin would be your only entry point to society. This is the foundation of tyranny; we do not agree to restructure our society, including justice and governance, to run on code! We do not choose to live (literally not metaphorically) inside a computer, simulated on our behalf. Additionally, the heavy machinery required to make and install the infrastructure, equipment, quantum servers and millions of devices, batteries, cameras, chips, fibers, in order to retrofit Earth for planetary automation is not powered by renewables! So much for "sustainability".

THE WAY THINGS WORK IN AN ADMINISTRATIVE STATE

WRITTEN BY BRENDA HANSON & WE THE PEOPLE - CATTARAUGUS COUNTY

A BUREAUCRACY — once birthed — continues to grow. And grow. A BUREAUCRACY metastasizes... pushing into areas that the government of a constitutional republic was never intended to push into. Bureaucracies bury us with too much stuff to keep up with.... how in the world are we to stay on top of all of this? We can't. So we throw our hands up and give up even trying to keep up. And then....it just piles on and on.... This is the nature and tendency of a bureaucracy. It is self-perpetuating....and it smothers.

qortal.org

C40 CITIES CLIMATE LEADERSHIP GROUP

A World Economic Forum Bloomberg/Soros-funded organization called **C40 Cities Climate Leadership Group (c40.org)** of 100 mayors of the world's leading cities is making shocking recommendations it wants to implement for the sake of the alleged "climate crisis" and in order to meet the WEF goal of a "net zero carbon future". Mayors of C40 cities have committed to cut emissions in half by 2030, and to build "equitable" communities. Bloomberg, as President of the C40 board owns a massive car collection, one of the very things C40 wants to take away from citizens. If you like the freedom of deciding what food you want to eat, what kind of car you want to drive, how often you want to fly, and what clothing you want to buy, then you should be extremely wary of any globalist tied to C40 and the WEF. While these globalists tell you their skills are valuable in planning your town's future for the next quarter century, the truth is they plan to adopt radical policies that will severely restrict and/or remove our personal freedoms, including taking action around water, air quality, energy, food systems, transportation, and waste management. Walking and cycling networks are planned to

replace car use, ending ownership of all gas-powered vehicles, and moving to all electric vehicles. Also included is a severe limit on air travel, including one short return flight (<900 miles) per person every three years. "Food systems" is about adopting the "Planetary Health Diet", a predominantly vegetarian diet, with the goals of zero meat and dairy consumption. NYC has signed the pledge to be a "good food" city. Another climate action includes limiting people to just three new clothing items per year.

C40 programs are tied to the new, surveillance based economic system - cameras will monitor if citizens travel beyond a 1/2 mile from their home, allowing bankers to speculate & bet if they comply with NWO requirements, and measuring whether or not individuals are committed to "Diversity, Equity and Inclusion"— the basis of "Social Impact Investing". Surveillance programs will be justified by the need for protecting our safety, market insights and weather hazard mitigation.

LED STREETLIGHTS

WHY WERE OUR STREETLIGHTS RECENTLY CHANGED?

LIFI ("Light Fidelity") is the next iteration of Wifi, with unprecedented bandwidth, using light. LED streetlights work with the IoT as transmitters, and can send receive information and track individuals at home and on their street. Millions of units have been installed in each country worldwide. Every LED light connects to the internet for the "Internet of Things". We did not demand or want this system, despite such claims by unelected technocrats. No one asked for drones, demanded more capacity for data, or expressed concern about vulnerability or our "carbon footprint".

LET'S STOP NESTLE FROM TAKING AMERICA'S WATER!

The fight to stop Nestlé from taking America's water sources to sell in plastic bottles is ongoing! Primary water is produced by the earth! Underground springs still exist, even though they have been concealed: Springs and Wells of Manhattan and the Bronx, New York City, at the End of the Nineteenth Century, January 1, 1938. Before the turn of the 20th century, gathering a pail full of water involved a walk to the nearest spring or well. Luckily, for early residents, Inwood was blessed with some of the freshest and coolest drinking water Mother Nature could provide—and for early settlers, those water sources were plentiful, especially in the then undeveloped land of northern Manhattan.

But, as time marched on, most of these naturally occurring water supplies were plugged up, paved over and simply forgotten. If not for the writings and photographs of an obscure author named James Reuel Smith, even the memory of these springs and wells might have been forever lost.
